

For those who don't want to waste time on assembling lights in production, Spanninga has designed the **Illico & Presto** set.

This tiny set suitable for all kinds of bikes (city, MTB, racing bikes, etc.) features for both the front and the rearlight a universal fitting for quick and easy use. 2 secs and it's done!

For the Illico (Front), equipped with a standard bulb and operated by 2 AA batteries, mounting on handlebars can be done easily thanks to its clever clip, fitting diameters from 22.2 to 25.4 mm. The Illico has an integrated front reflector.

The Presto (rearlight) is mountable on seat-posts from 17 to 30 mm with its universal rubber strap. As it runs on 2 LR 44 batteries, the size of the Presto is extremely small and compact.

Both Illico & Presto are robust, shock and water resistant and have a low-battery indicator for more security. The Illico & Presto comply with the French regulation standards.

Product	Article number	Incl. batteries	Excl. batteries	Minimum quantity
ILLICO headlamp	169600	•		100
ILLICO headlamp	169001		•	100
PRESTO rearlight	139151	•		200
PRESTO rearlight	139150		•	200
